Item 4: Advisory Business

A. Description of the Advisory Firm

Cobblestone Asset Management LLC (hereinafter “Cobblestone Asset Management”) is a Limited Liability Company organized in the State of Virginia. The firm was formed in March 2019, and the principal owner is Cobblestone Asset Management.

B. Types of Advisory Services

Portfolio Management Services

Cobblestone Asset Management offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. Cobblestone Asset Management creates an Investment Policy Statement for each client, which outlines the client’s current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

Cobblestone Asset Management evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

Cobblestone Asset Management seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of Cobblestone Asset Management’s economic, investment or other financial interests. To meet its fiduciary obligations, Cobblestone Asset Management attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, Cobblestone Asset Management’s policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is Cobblestone Asset Management’s policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent among its clients on a fair and equitable basis over time.

Platform Services

Cobblestone Asset Management may provide their platform to advisors unaffiliated with Cobblestone Asset Management. These third-party advisors would utilize Cobblestone Asset Management's platform to provide portfolio management services to their clients. This relationship will be memorialized in each contract between Cobblestone

Asset Management and the third-party advisor. Cobblestone Asset Management will have no contact with the third-party advisors' clients. The third-party advisor will be responsible for client due diligence, suitability, and providing Cobblestone Asset Management with discretionary authority, if applicable.

Selection of Other Advisors

Cobblestone Asset Management may direct clients to third-party investment advisors. Before selecting other advisors for clients, Cobblestone Asset Management will verify that all recommended advisors are properly licensed, notice filed, or exempt in the states where Cobblestone Asset Management is recommending the advisor to clients.

Investment Advisor Representatives

Investment Advisor Representatives (IAR) may be a direct part of the Cobblestone Asset Management team or they may choose to use a "Doing Business As (DBA)" name. The DBA scenario allows the IAR to use logo, company name, and other branding elements of their DBA.

Firms operating within Cobblestone Asset Management while using a DBA:

- Investar Asset Management

Services Limited to Specific Types of Investments

Cobblestone Asset Management generally limits its investment advice to equities, fixed income securities, real estate funds (including REITs), ETFs (including ETFs in the gold and precious metal sectors), mutual funds treasury inflation protected/inflation linked bonds, commodities, non-U.S. securities, venture capital funds and private placements, and insurance products including annuities although Cobblestone Asset Management primarily recommends ETFs. Cobblestone Asset Management may use other securities as well to help diversify a portfolio when applicable.

Written Acknowledgement of Fiduciary Status

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations

- (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

C. Client Tailored Services and Client Imposed Restrictions

Cobblestone Asset Management will tailor a program for each individual client. This will include an interview session to get to know the client's specific needs and requirements as well as a plan that will be executed by Cobblestone Asset Management on behalf of the client. Cobblestone Asset Management may use model allocations together with a specific set of recommendations for each client based on their personal restrictions, needs, and targets. Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent Cobblestone Asset Management from properly servicing the client account, or if the restrictions would require Cobblestone Asset Management to deviate from its standard suite of services, Cobblestone Asset Management reserves the right to end the relationship.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees and transaction costs. Cobblestone Asset Management acts as portfolio manager for and sponsor of a wrap fee program, which is an investment program where the client pays one stated fee that includes management fees, transaction costs, and certain other administrative fees. However, this brochure describes Cobblestone Asset Management's non-wrap fee advisory services; clients utilizing Cobblestone Asset Management's wrap fee portfolio management should see Cobblestone Asset Management's separate Wrap Fee Program Brochure. Cobblestone Asset Management manages the investments in the wrap fee program, but does not manage those wrap fee accounts any differently than it would manage non-wrap fee accounts.

The benefits under a wrap fee program depend, in part, upon the size of the account, the costs associated with managing the account, and the frequency or type of securities transactions executed in the account. For example, a wrap fee program may not be suitable for all accounts, including but not limited to accountings holding primarily, and for any substantial period of time, cash or cash equivalents investments, fixed income securities or no-transaction-fee mutual funds, or any other type of security that can be traded without commissions or other transaction fees. In order to evaluate whether a wrap fee arrangement is appropriate for you, you should compare the agreed-upon Wrap Fee Program with the amounts that would be charged by other advisers, broker-dealers, and

custodians, for advisory fees, brokerage and execution costs, and custodial services comparable to those provided under the Wrap Fee Program.

E. Assets Under Management

Cobblestone Asset Management has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$180,833,870	\$0	December 2024

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

The standard fee schedule is set forth below:

Total Assets Under Management	Annual Fee
All Assets	Up to 2.0%

The advisory fee is calculated using the value of the assets in the Account on the last business day of the prior billing period.

The final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty, for full refund of Cobblestone Asset Management's fees, within five business days of signing the Investment Advisory Agreement. Thereafter, clients may terminate the Investment Advisory Agreement immediately upon written notice.

Platform Fees

Cobblestone Asset Management will charge third party advisors up to 25 basis points of their clients' assets under management in Cobblestone Asset Management's platform. The fee is negotiable based on the amount of assets under management the third party advisor is placing on Cobblestone Asset Management's platform.

Selection of Other Advisors Fees

Cobblestone Asset Management may direct clients to third-party investment advisors. Clients will pay Cobblestone Asset Management its standard fee in addition to the standard fee for the advisors to which it directs those clients. The fees shared are

negotiable and will not exceed any limit imposed by any regulatory agency. The notice of termination requirement and payment of fees for third-party investment advisors will depend on the specific third-party advisor selected.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid quarterly or monthly in advance or arrears.

Payment of Platform Fees

Platform fees can be paid in advance or arrears. The frequency method of paying fees for selection of third-party managers will depend on the specific third-party advisor selected and will be disclosed to the client prior to entering into a relationship with the third-party advisor.

Payment of Selection of Other Advisors Fees

The timing, frequency, and method of paying fees for selection of third-party managers will depend on the specific third-party advisor selected and will be disclosed to the client prior to entering into a relationship with the third-party advisor.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third-party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by Cobblestone Asset Management. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

Cobblestone Asset Management may collect fees in advance or arrears. Refunds for fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check, or return deposit back into the client's account.

For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

E. Outside Compensation For the Sale of Securities to Clients

Richard Robert Krafcik, Ronald Kenneth Stack, and Jason Dodzik are registered representatives of a broker-dealer. Richard Robert Krafcik, Ronald Kenneth Stack, and Jason Dodzik are also insurance agents. In these roles, they accept compensation for the sale of investment products to Cobblestone Asset Management clients.

Supervised persons may accept compensation for the sale of investment products, including asset based sales charges or service fees from the sale of mutual funds to Cobblestone Asset Management's clients. This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of investment products for which the supervised persons receives compensation, Cobblestone Asset Management will document the conflict of interest in the client file and inform the client of the conflict of interest.

Clients always have the option to purchase Cobblestone Asset Management recommended products through other brokers or agents that are not affiliated with Cobblestone Asset Management.

Commissions are not Cobblestone Asset Management's primary source of compensation for advisory services.

Advisory fees that are charged to clients are reduced to offset the commissions or markups on investment products recommended to clients. Cobblestone Asset Management will not charge an advisory fee on investment products where a commission is received.

Item 6: Performance-Based Fees and Side-By-Side Management

Cobblestone Asset Management does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

Cobblestone Asset Management generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Corporations or Business Entities
- ❖ Investment Advisors/Financial Advisors

There is no account minimum for any of Cobblestone Asset Management's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

Cobblestone Asset Management's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. Cobblestone Asset Management uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

Cobblestone Asset Management uses long term trading, short term trading and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not

always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

Cobblestone Asset Management's use of options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

Cobblestone Asset Management's use of options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The

degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF's shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a "naked" or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option

transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

As a registered representative of Independent Financial Group, Richard Robert Krafcik accepts compensation for the sale of securities.

As a registered representative of Independent Financial Group, Ronald Kenneth Stack accepts compensation for the sale of securities.

As a registered representative of Independent Financial Group, Jason Dodzik accepts compensation for the sale of securities.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither Cobblestone Asset Management nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Richard Robert Krafcik is a registered representative of Independent Financial Group and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment advisor. Cobblestone Asset Management always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of Cobblestone Asset Management in such individual's capacity as a registered representative.

Richard Robert Krafcik is an independent licensed insurance agent. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of Cobblestone Asset Management are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. Cobblestone Asset Management addresses this conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. Cobblestone Asset Management periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. Cobblestone Asset Management will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by Cobblestone Asset Management's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Ronald Kenneth Stack is a registered representative of Independent Financial Group and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a

conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment advisor. Cobblestone Asset Management always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of Cobblestone Asset Management in such individual's capacity as a registered representative.

Ronald Kenneth Stack is an independent licensed insurance agent. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of Cobblestone Asset Management are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. Cobblestone Asset Management addresses this conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. Cobblestone Asset Management periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. Cobblestone Asset Management will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by Cobblestone Asset Management's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Jason Dodzik is a registered representative of Independent Financial Group and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment advisor. Cobblestone Asset Management always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. No client is ever under any obligation to purchase any insurance product. Insurance products recommended by Cobblestone Asset Management's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Jason Dodzik maintains Investar Asset Management (IAM) as his DBA for marketing purposes. This allows Jason to use IAM's logo, company name, and other branding elements. Investar Asset Management's phone number and address is the same as CAM.

D. Selection of Other Advisors or Managers and How This Advisor is Compensated for Those Selections

Cobblestone Asset Management may direct clients to third-party investment advisors. Clients will pay Cobblestone Asset Management its standard fee in addition to the standard fee for the advisors to which it directs those clients. The fees will not exceed any limit imposed by any regulatory agency. Cobblestone Asset Management will always act in the best interests of the client, including when determining which third-party investment advisor to recommend to clients. Cobblestone Asset Management will ensure that all recommended advisors are exempt, licensed or notice filed in the states in which Cobblestone Asset Management is recommending them to clients.
advisor

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

Cobblestone Asset Management has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education,

Recordkeeping, Annual Review, and Sanctions. Cobblestone Asset Management's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

Cobblestone Asset Management does not recommend that clients buy or sell any security in which a related person to Cobblestone Asset Management or Cobblestone Asset Management has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of Cobblestone Asset Management may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of Cobblestone Asset Management to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. Cobblestone Asset Management will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of Cobblestone Asset Management may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of Cobblestone Asset Management to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, Cobblestone Asset Management will never engage in trading that operates to the client's disadvantage if representatives of Cobblestone Asset Management buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on Cobblestone Asset Management's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and Cobblestone Asset Management may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited

to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in Cobblestone Asset Management's research efforts. Cobblestone Asset Management will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

Cobblestone Asset Management will recommend clients to use Schwab Institutional, a division of Charles Schwab & Co., Inc. Cobblestone Asset Management work with other custodian including but not limited to: Pershing, Fidelity, First Clearing

1. Research and Other Soft-Dollar Benefits

While Cobblestone Asset Management has no formal soft dollars program in which soft dollars are used to pay for third party services, Cobblestone Asset Management may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). Cobblestone Asset Management may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and Cobblestone Asset Management does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. Cobblestone Asset Management benefits by not having to produce or pay for the research, products or services, and Cobblestone Asset Management will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that Cobblestone Asset Management's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

Cobblestone Asset Management receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

Cobblestone Asset Management will require clients to use a specific broker-dealer to execute transactions. Not all advisors require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

If Cobblestone Asset Management buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, Cobblestone Asset Management would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be

reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. Cobblestone Asset Management would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for Cobblestone Asset Management's advisory services provided on an ongoing basis are reviewed at least Annually by Richard R Krafcik, President, with regard to clients' respective investment policies and risk tolerance levels. All accounts at Cobblestone Asset Management are assigned to this reviewer.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

C. Content and Frequency of Regular Reports Provided to Clients

Each client of Cobblestone Asset Management's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

Cobblestone Asset Management does not receive any economic benefit, directly or indirectly from any third party for advice rendered to Cobblestone Asset Management's clients.

With respect to Schwab, Cobblestone Asset Management receives access to Schwab's institutional trading and custody services, which are typically not available to Schwab

retail investors. These services generally are available to independent investment advisors on an unsolicited basis, at no charge to them so long as a total of at least \$10 million of the advisor's clients' assets are maintained in accounts at Schwab Advisor Services. Schwab's services include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment. For Cobblestone Asset Management client accounts maintained in its custody, Schwab generally does not charge separately for custody services but is compensated by account holders through commissions or other transaction-related or asset-based fees for securities trades that are executed through Schwab or that settle into Schwab accounts.

Schwab also makes available to Cobblestone Asset Management other products and services that benefit Cobblestone Asset Management but may not benefit its clients' accounts. These benefits may include national, regional or Cobblestone Asset Management specific educational events organized and/or sponsored by Schwab Advisor Services. Other potential benefits may include occasional business entertainment of personnel of Cobblestone Asset Management by Schwab Advisor Services personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services assist Cobblestone Asset Management in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts, if applicable), provide research, pricing information and other market data, facilitate payment of Cobblestone Asset Management's fees from its clients' accounts (if applicable), and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of Cobblestone Asset Management's accounts. Schwab Advisor Services also makes available to Cobblestone Asset Management other services intended to help Cobblestone Asset Management manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance and marketing. In addition, Schwab may make available, arrange and/or pay vendors for these types of services rendered to Cobblestone Asset Management by independent third parties. Schwab Advisor Services may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to Cobblestone Asset Management. Cobblestone Asset Management is independently owned and operated and not affiliated with Schwab.

B. Compensation to Non - Advisory Personnel for Client Referrals

Cobblestone Asset Management does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, Cobblestone Asset Management will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

Cobblestone Asset Management provides discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, Cobblestone Asset Management generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share. In some instances, Cobblestone Asset Management's discretionary authority in making these determinations may be limited by conditions imposed by a client (in investment guidelines or objectives, or client instructions otherwise provided to Cobblestone Asset Management).

Item 17: Voting Client Securities (Proxy Voting)

Cobblestone Asset Management will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

Cobblestone Asset Management neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither Cobblestone Asset Management nor its management has any financial condition that is likely to reasonably impair Cobblestone Asset Management's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

Cobblestone Asset Management has not been the subject of a bankruptcy petition in the last ten years.
